

THE INTERNATIONAL SCHOOL OF AGRICULTURAL SCIENCES

The Hebrew University
of Jerusalem

The Robert H. Smith Faculty of
Agriculture, Food and Environment

Summer Program in Agricultural Sciences

July 11 to 28, 2022 - 70 Academic hours - 5 HUJI Credits

Visiting students are invited to study two advanced agricultural science courses taken together in a special summer program at the Hebrew University's Faculty of Agriculture, Food & Environment at the Rehovot campus, organized by The International School of Agricultural Sciences:

Effluents – Reclamation, irrigation and environmental implications
Effects of biotic and abiotic stresses on agricultural crops

The International School of Agricultural Sciences draws students from around the world to its one-year M.Sc. in Agriculture and M.Sc. in Nutrition programs: Plant Sciences, Environmental Quality Sciences, Animal Sciences and Nutrition. Since 1997, 245 students from more than 40 countries have participated. While earning a fully-accredited Hebrew University non-thesis degree, participants have the opportunity to meet new friends from different cultures and continents and to experience the rich lifestyle and culture of Israel.

The Summer Program is taught by professional, experienced academic faculty. The teaching method includes classroom instruction, hands-on practice and professional field trips to relevant locations to observe practical applications.

Admission requirements are: a completed B.Sc. degree, or senior year, in agriculture, environmental sciences, plant sciences, natural sciences, biology, biotechnology or related fields from a recognized university; high level of English proficiency in all skills. Previous agricultural experience is recommended but not mandatory.

Student housing is available at the Smith Faculty campus, a peaceful enclave in the heart of the centrally-located city of Rehovot. Just outside the main gate of the campus and within easy reach are transportation services, shops, restaurants and pubs.

Extra-curricular activities included in the summer program are sightseeing tours and organized social events.

Tuition and housing scholarships are available for students from India and China

Application deadline: April 28, 2022

Registration Fee: \$200 from suitable candidates, non-refundable.
